DEVICE AND SOURCE

DJI Parts Replacement & Maintenance Record

Keep the actual device, selected component, written scope and work evidence together. Complete one record for one device and one job.

01 Identify device → 02 Check source → 03 Record work → 04 Review findings

Record reference

Date opened

Exact DJI model / device version

Device or internal reference (serial number optional)

Controller, goggles, batteries or relevant configuration

Reason for this record

- ☐ Identified part replacement
- ☐ Planned maintenance task
- ☐ Observed issue
- ☐ Other / not yet established

Applicable instruction / source and revision

Task or timing basis from that source

Known evidence references / information still needed

Guide: reboot-hub.com/pages/dji-parts-accessories-buying-guide

Use instructions that apply to the exact model. This template defines no universal service interval or replacement schedule.

COMPONENT AND WRITTEN SCOPE

Match the component

Record what is written and visible. Keep an unknown marking, revision or fit requirement as unknown until suitable evidence is available.

Identity detail	Original component	Replacement / listing
Part or assembly name		
Position / side		
Marking / revision, if legible		
Connector / mount details		
Supplied pieces		
Declared condition / prior use		

Source condition wording

☐ New ☐ OEM-pulled ☐ Open-box ☐ Other / unknown

Supplier listing URL / order reference

Included pieces / separate items still required

Written work scope and approval reference

Fit, condition or installation points still requiring confirmation

WORK, REVIEW AND FOLLOW-UP

Record the work

Write the action as actually performed and identify its evidence. A planned task and a completed task are different record states.

Date	Task / action performed	Evidence / result ref.	Recorded by

Checks actually carried out and evidence attached

Findings, limitations and items not assessed

Next action, source for timing and review date

Reviewed / recorded by

Date
